Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Patent No. 6399315

GENERAL INFORMATION:

APPLICANT: Pertrin, Marilyn H.

APPLICANT: Chen, Ruoping

APPLICANT: Usewis, Kathy A.

APPLICANT: Usewis, Kathy A.

APPLICANT: Donaldson, Cynthia J.

APPLICANT: Sawchenko, Paul

TITLE OF INVENTION: Cloning and Recombinant Production of

TITLE OF INVENTION: Cloning and Recombinant Production of

TITLE OF INVENTION: CRP Receptor (8)

FILE REPERENCE: P41-90002

CURRENT APPLICATION NUMBER: US/08/482,746B
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 RESULT 5

BARLIER FILING DATE: 1993-08-23

BARLIER APPLICATION NUMBER: US 08/079,320

EARLIER PILING DATE: 1993-06-18

NUMBER OF SEQ ID NOS: 15

SOFTWARE: FastSEQ for Windows Version 3.0

SOTTWARE: PastSEQ for Windows Version 3.0

TYBE: DNA

ORGANISM: Homo sapiens

FRATURE:

NAME/KEY: CDS

LOCATION: (82)...(1413)

OTHER INFORMATION: CRF-R splice-variant insert fragment inserted

OTHER INFORMATION: Detween nucleotides 516-517 of SEQ ID NO:1.

OTHER INFORMATION: "CRF-R in sequence is contained in clone

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
